EDUCATION

NEW ERA UNIVERSITY

Bachelor of Science, Information Technology

Central Ave, Metro Manila

2022 – 2026

- Relevant Coursework: Web Development, Mobile Development, Database Management, Cisco Networking, and Human-Computer Interaction.

TECHNICAL SKILLS

Programming Languages: Java, C++, PHP, JavaScript, TypeScript, Node.js, Bash, PowerShell

Operating Systems: Windows, Linux

Database: MySQL, IBM DB2 Cloud

Data Tools: Excel, Google Sheets, Google Colab, Power BI

Design: Figma, Lucidchart

Networking: Cisco Packet Tracer

WORK EXPERIENCE

Frontend Developer Intern | Simplevia Technology Inc.

Oct 2025 – Present

Client: Metropolitan Waterworks and Sewerage System (MWSS)

- Developed responsive components using TypeScript and Mantine UI, strictly following lead-defined documentation and design systems.
- Managed version control and environment scripts using Git/GitHub, Node.js, Bash, and PowerShell.

UI/UX Designer | Early-Stage E-commerce Startup

Remote

Isabela, Philippines

Feb 2025 – Sept 2025

- Executed full-cycle UI/UX design and prototyping using Figma for a growing e-commerce platform.
- Supported daily operations through email management and customer engagement.

Office Clerk | Double B Aggregates

Feb 2026 – Present

Serrano, Quezon City

- Facilitate office operations by managing high-volume document preparation, systematic filing, and the organization of physical and digital records.

PROJECT EXPERIENCE

Trendify & Booking System | Full-Stack Web Development

- Engineered a responsive PHP/MySQL store and a secure JS/PHP authentication system.
- Developed a high-security CRUD admin dashboard to manage site data and user registrations.

DigiKnow | Mobile Application Development

- Built a Java-based Android application specialized in digital accessibility for the elderly.
- Focused on intuitive UI elements to bridge the gap between complex technology and senior users.

Network & Cloud Data | Infrastructure & Design

- Architected complex Cisco topologies implementing VLANs, subnets, and routing protocols.
- Managed IBM DB2 & MySQL schemas with Power BI and Google Colab for data visualization.

Unitech & Wanderlust | Product Prototyping

- Created high-fidelity Figma prototypes focusing on responsive UX and modern design systems.
- Transformed user requirements into interactive, click-through wireframes for stakeholder review.
